WORKBOOK

2023/24

100% MADE IN AUSTRIA

AT KOMPERDELL YOU KNOW WHERE IT IS MADE AND WHO IS RESPONSIBLE FOR IT

From the first idea to serial production, we are one stop manufacturer in the heart of Austria. For more than 100 years we are an innovative pioneer providing outstanding quality, unique service and honest sustainability.

WE ARE INNOVATOR AND MANUFACTURER

We are one of the few brands who are still manufacturer. Apart from our own brand we develop, design and manufacture individual poles for more than 40 leading ski and retail brands.

FAST AND FLEXIBLE INDIVIDUAL PRODUCTION

Due to our regional production we are able to produce fast and flexible with fewer logistics. Our large stock of raw materials and moreover the passion of our employees enables us to shorten lead times to an absolute minimum.

HONEST SUSTAINABILITY

We run our business with an honest awareness of our environment without the need of any „green“ certificates. Due to our production in Mondsee/Austria we have to fulfil highest environmental standards as we produce where we live and where others enjoy their vacation.

UNIQUE QUALITY AND SERVICE

Our aim is to produce highest quality products and offer a unique 3-year-free repair service to extend our product's lifecycle.

CHAMPION'S CHOICE

TRUSTED BY MORE THAN 200 ATHLETES

We are collaborating with the best athletes to always be one step ahead. Resulting in the most successful racing brand in history.

SOLID SCREW JOINT
for extra tight fit and no twisting of the punch protection

PUNCH PROTECTION
made of highly resistant thermoplastic resin, absorbs hard impacts

SHRINKING TUBE
reinforcing of the shaft

STRAP SECURING
prevents tearing out of the strap

WORLD CUP EQUIPMENT
extremely stiff materials and precise manufacturing for highest demands

CLICK-IN SKICROSS STRAP
keeping the hands free at the starting gate

CARBON TUBE WITH TI CORE
for maximum performance

NATIONALTEAM CARBON SLALOM 12,3

TOURING

THE LIGHTEST POLE ON THE MARKET – 100% MADE IN AUSTRIA

We are the experts for ultra light products made of carbon and composite materials due to decades of experience and a high level of technical know-how in manufacturing. This enabled us to create the most lightweight touring program on the market. We are the only brand that can supply this variety of touring poles perfectly matching ski tourers requirements.

TOURING GRIP

The special designed grip shape can be used to adjust almost all touring bindings on the market. Additionally, most of our touring poles feature an extended grip zone to be able to grip on different positions on steep terrain.

28°
 adapts to the
 slope - up to 28°

ICE-FLEX BASKET

With the moveable ice-flex system the floating basket adapts to the slope up to 28°. This feature increases your safety, especially in steep terrain and on hard surfaces. Despite the large basket the tip still finds a secure hold.

THE STRONGEST LOCKING MECHANISM ON THE MARKET

We are the only ones who produce a locking system entirely made of aluminum. This Powerlock 3.0 guarantees absolutely safety with a holding power of up to 200 kg and is not affected by any weather conditions at all.

3 YEARS FREE REPAIR SERVICE

Komperdell guarantees highest quality and unique service. We repair your poles, no matter what or how it happened. Because for us, sustainability means a conscious, long-term approach to our environment – to nature and, above all, to our customers. This is one of our approaches for sustainability.

SNOWSHOES

100% CARBON

We offer the lightest snowshoe on the market fully made from carbon. The result is truly amazing - 50 % less weight on your foot makes all the difference! You will feel it on every single step.

THE MOST LIGHTWEIGHT SNOWSHOE IN THE WORLD

The full snowshoe will be laminated in one single step in production. The use of ultralight Carbon and this unique production process saves more than 50% in weight without sacrificing any strength.

MAXIMUM TRACTION

Ice Rail Claws, made from stainless steel, are laminated directly into the frame and provide tons of traction on ice and hard packed snow.

KEEP YOUR FEET WARM AND DRY

The insulated neoprene toe cover keeps your feet warm and dry, even in deep snow. It's very easy to attach it to the binding.

NEW QUICKLOCK BINDING

The new quicklock binding with lacing system is way easier to get in and covers your shoe for perfect fit. Especially for women it is an absolute game-changer regarding comfort well-being.

CARBON SNOWSHOES

CARBON SNOWSHOES

THE WORLD'S 1ST SNOWSHOES MADE OF CARBON

50% less weight and incredible traction on ice and hard packed snow.

PROTECTION #1

WE ARE A LEADER IN INNOVATIVE DEVELOPMENTS FOR PROTECTORS IN WINTER-, MOTORCYCLE-, BIKE- AND EQUESTRIAN SPORTS FOR MORE THAN 20 YEARS.

Komperdell is the only brand to develop not only the protective technology but also the appropriate garment. This results in a perfectly harmonizing protective system that fits perfectly and does not have to compromise on safety and comfort.

AWARD WINNING PROTECTION TECHNOLOGY

Our protectors offer maximum safety, have the biggest continuous protection zone and are leading in residual force values. In case of a fall our protectors absorb up to 93% of the impact energy due to the long-lasting, innovative layered structure of the protectors, which does not lose its effectiveness even years later. Our protector technology has already won more than 50 international awards.

ONE-STOP INNOVATION

The protector as well as the garment are developed in our headquarters in Mondsee from the first idea up to the final product. Apart from our own brand, we develop, design and manufacture protectors for a number of leading brands in the sports and motorcycle sector.

25 YEARS OF KNOW-HOW

For more than 20 years we develop for and with leading brands of the motorcycle industry. Thus we can use our valuable know-how of the most extreme field of use for efficient protection garments also for winter-, equestrian- and bike sports.

WINTERSPORTS

WHY A KOMPERDELL PROTECTOR?

We are the only brand to not only develop and manufacture the garment but also the protector itself. This gives us the opportunity to perfectly match protector and garment. Over the years we have been able to constantly improve our protector systems, so that our new protectors are once again 25% lighter and more flexible.

CROSSFLEX ATHLETIC A COMPLETELY NEW PROTECTOR SYSTEM

NEW PROTECTOR FOAM
our new foam is up to 25% lighter with the same impact protection

UNLIMITED MULTIPLE IMPACT CAPABILITY

UNLIMITED MULTI IMPACT CAPABILITY

CLEVER MULTILAYER SYSTEM
breathable and flexible, fits perfectly on the back

100% BREATHABLE

WASHABLE
our products can be washed without problems

WASHABLE

1 A COMPLETELY NEW PROTECTOR

As the only protector brand we design, develop and manufacture our protector inserts by our own. For the new generation of our Cross Flex protectors we have developed a new protector foam that is 25% lighter with the same impact protection and our typical multi-impact capability.

2 25% LIGHTER, MORE FLEXIBLE AND PERFECT BREATHABLE

Due to our typical multilayer construction and the seamless integration the protector fits perfectly in the garment. Additional 3D Mesh on the protector provides an optimal ventilation on the body. We don't make compromises on safety and comfort on our Cross Flex protector.

BALLISTIC SYSTEM

BRILLIANT ENGINEERING

With our Ballistic System you get two brilliant products in one: The chest protector can be replaced by a normal strap system so that it turns into a Backpack – unique and only from Komperdell.

1 SYSTEM = 2 BRILLIANT PRODUCTS

BALLISTIC SET WINTERSPORTS | BIKE | MOTORCYCLE

BIKE & MOTORCYCLE

WHY DO YOU NEED A BACK PROTECTOR?

Especially in the extreme application areas of motorcycling and biking, not only an optimally guarding protector is crucial, but also a pleasant wearing comfort and good ventilation. No other fulfils the highest protection values and is at the same time as comfortable to wear as a Komperdell protector!

EQUESTRIAN

WHY DO YOU NEED A BACK PROTECTOR?

The most common insures are caused by horse kicks or rotational falls, where the horse lands on the rider. The Komperdell protector can help in both cases, as 93% of the impact energy is absorbed. Therefore, a helmet as well as a back protector should be a part of every rider's basic essential.

3 TYPES OF PROTECTORS FOR MAXIMUM SAFETY IN EQUITATION

1 SAFETY VEST FRONTZIP EN 13158:2018 – LEVEL 3

Our safest equestrian protector with 360° protection and EN 13158:2018 - Level 3 certification. The ergonomic cut and the especially soft, flexible protector body ensure maximum comfort with best protection values. Perfect for cross-country riding and approved for eventing.

2 BALLISTIC FLEX FIT EN 1621-2 – LEVEL 2

In addition to the multi-layered back protector, the vest offers protection zones in the front and rib areas and is therefore the ideal protector for daily training. The automatic width adjustment ensures almost complete all-round protection with the best wearing comfort, as the vest automatically adapts to the rider's shape.

3 CASUAL PROTECTION EN 1621-2 – LEVEL 2

The casual line is the perfect alternative for daily training and work with the horse, as the protector is integrated directly into the garment, eliminating one layer of functional clothing. Absolute lightness and breathability guaranteed!

SAFETY VEST LEVEL 3

EN 13158:2018
LEVEL 3

SAFETY VEST

360° PERFECT SAFETY WITH OUR LEVEL 3 VEST

Our safety vest providing 360° protection is amazingly comfortable. Due to its special ergonomic cut it perfectly contours to your individual body shape. The multi-layer construction and the especially soft foam guarantee a perfectly ergonomic fit.

extended perforation
in the front and back

TREKKING

20% LIGHTER POLES AND THE STRONGEST LOCKING MECHANISM ON THE MARKET

We are pioneers in carbon trekking poles and have dedicated ourselves like no other brand to a lightweight construction without losing reliability and stability.

INCREDIBLE LIGHTWEIGHT

While other brands buy carbon tubes of the shelf, we have been developing and manufacturing our carbon shafts by ourselves for more than 25 years. When we develop a new model it starts with the development of the shaft itself.

THE STRONGEST LOCKING MECHANISM

We are the only ones who produce a locking system entirely made of aluminum. This Powerlock 3.0 guarantees absolutely safety with a holding power of up to 200 kg and is not affected by any weather conditions at all.

UNIQUE FXP FOLDING SYSTEM

The first and only self-deploying mechanism on the market. A solid mechanical connection that guarantees safety on all activities. The self-deploying feature is a game-changer and makes the handling of the pole as fast and easy as possible.

FXP CARBON

MOUNTAINEERING WAS NEVER EASIER!

Handling the FXP is as easy as it can be. The packed pole is held together by a Velcro strap and once opened, it unfolds completely by itself. This is not only easy, it also saves time and creates a unique experience.
